**Explainable and Interpretable Models in Computer Vision and Machine Learning** Hugo Jair Escalante,Sergio Escalera,Isabelle Guyon,Xavier Baró,Yağmur Güçlütürk,Umut Güçlü,Marcel van Gerven,2018-11-29 This book compiles leading research on the development of explainable and interpretable machine learning methods in the context of computer vision and machine learning. Research progress in computer vision and pattern recognition has led to a variety of modeling techniques with almost human-like performance. Although these models have obtained astounding results, they are limited in their explainability and interpretability: what is the rationale behind the decision made? what in the model structure explains its functioning? Hence, while good performance is a critical required characteristic for learning machines, explainability and interpretability capabilities are needed to take learning machines to the next step to include them in decision support systems involving human supervision. This book, written by leading international researchers, addresses key topics of explainability and interpretability, including the following: · Evaluation and Generalization in Interpretable Machine Learning · Explanation Methods in Deep Learning · Learning Functional Causal Models with Generative Neural Networks · Learning Interpretable Rules for Multi-Label Classification · Structuring Neural Networks for More Explainable Predictions · Generating Post Hoc Rationales of Deep Visual Classification Decisions · Ensembling Visual Explanations · Explainable Deep Driving by Visualizing Causal Attention · Interdisciplinary Perspective on Algorithmic Job Candidate Search · Multimodal Personality Trait Analysis for Explainable Modeling of Job Interview Decisions · Inherent Explainability Pattern Theory-based Video Event Interpretations

*In Good Faith?* Jessie Mitchell,2011-01-01 In the early decades of the 19th century, Indigenous Australians suffered

devastating losses at the hands of British colonists, who largely ignored their sovereignty and even their humanity. At the same time, however, a new wave of Christian humanitarians were arriving in the colonies, troubled by Aboriginal suffering and arguing that colonists had

*Handbook of Tourism and Quality-of-Life Research* Muzaffer Uysal, Richard Perdue, M. Joseph Sirgy, 2012-01-07 Quality of life (QOL) research in tourism has gained much momentum over the last two decades. Academics working in this area research issues related to tourists and host communities. Practitioners are becoming increasingly interested in understanding the science that allows them to develop better marketing and managerial programs designed to enhance the quality of life of tourists. Tourism bureaus and government agencies are increasingly interested in issues of sustainable tourism, specifically in understanding and measuring the impact of tourism on the quality of life of the residents of the host communities. This handbook covers all relevant topics and is divided into two parts: research relating to travelers/tourists, and research relating to the residents of host communities. It is the only state-of-the-art reference book in its field and will prove invaluable to academics interested in QOL research, as well as tourism practitioners interested in applying the science of QOL in the tourism industry.

Narrative Inquiry in Music Education Margaret S. Barrett, Sandra L. Stauffer, 2009-03-17 Margaret S. Barrett and Sandra L. Stauffer We live in a “congenial moment for stories” (Pinnegar & Daynes, 2007, p. 30), a time in which narrative has taken up a place in the “landscape” of inquiry in the social sciences. This renewed interest in storying and stories as both process and product (as old text and research text) of inquiry may be attributed to various methodological and conceptual “turns,” including the linguistic and cultural, that have taken place in the humanities and social sciences over the past decades. The purpose of this book is to explore the “narrative turn” in music education, to - amine the uses of narrative inquiry for music education, and to cultivate ground for narrative inquiry to seed and ourish alongside other methodological approaches in music education. In a discipline whose early research strength was founded on an alignment with thesocialsciences,particularlythe psychometrictradition,oneofthekey challenges for those embarking on narrative inquiry in music education is to ensure that its use is more than that of a “musical ornament,” an elaboration on the established themes of psychometric inquiry, those of measurement and certainty. We suggest that narrative inquiry is more than a “turn” (as noun), “a melodic embellishment that is played around a given note” (Encarta World English Dictionary, 2007, n. p. ); it is more than elaboration on a position, the adding of extra notes to make a melody more beautiful or interesting.

**The Murray River** Shane Strudwick,2012 At more than 2,520 kilometres long, [the Murray] is [Australia's] most important river. ... From ancient times, to pioneering days, to the environmental challenges of today - it has been at the centre of the story of [Australia]. ...--Back cover.

**Foreign Bodies** Bronwen Douglas,Chris Ballard,2008 The collection investigates the reciprocal significance of Oceania for the science of race, and of racial thinking for Oceania, during the two centuries after 1750, giving 'Oceania' a broad definition that encompasses the Pacific Islands, Australia, New Guinea, New Zealand, and the Malay Archipelago. We aim to denaturalize the modernist scientific concept of race by means of a dual historical strategy: tracking the emergence of the concept in western Europe at the end of the eighteenth century, its subsequent normalization, and its practical deployment in Oceanic contexts; and exposing the tensions, inconsistencies, and instability of rival discourses. Under the broad rubrics of dereifying race and decentring Europe, these essays make several distinctive and innovative contributions. First, they locate the formulation of particular racial theories and the science of race generally at the intersections of metropolitan biology or anthropology and encounters in the field a relatively recent strategy in the history of ideas. We neither dematerialize ideas as purely abstract and discursive nor reduce them to social relations and politics, but ground them personally and circumstantially in embodied human interactions.--Provided by publisher.

**Mark My Words** Mishuana Goeman,2013 Mark My Words traces settler colonialism as an enduring form of gendered spatial violence, demonstrating how it persists in the contemporary context of neoliberal globalization. In a strong and lucid voice, Mishuana Goeman provides close readings of literary texts, arguing that it is vital to refocus the efforts of Native nations beyond replicating settler models of territory, jurisdiction, and race.

A Postcapitalist Politics J. K. Gibson-Graham,2006 A postcapitalist politics reveals a prolific landscape of economic diversity - one that is not exclusively or predominantly capitalist - and examines the challenges and successes of alternative economic interventions. Marshaling empirical evidence from local economic projects and action research in the United States, Australia, and Asia, Gibson-Graham produces a distinctive political imaginary with three intersecting moments: a politics of language, of the subject, and of collective action. Describing a politics of possibility that can build different economies, they urge us to confront the forces that stand in the way of economic experimentation and to explore new ways of moving from theory to action. --book cover.
