**Jared M. Diamond**

The Politics of Species Raymond Corbey, Annette Lanjouw, 2013-09-05 Experts from a range of disciplines identify the key barriers to a definition of moral respect that includes nonhuman animals.

*A Plea for the Animals* Matthieu Ricard, 2016-10-04 A powerful and wide-ranging indictment of the treatment of animals by humans--and an eloquent plea for animal rights. Every cow just wants to be happy. Every chicken just wants to be free. Every bear, dog, or mouse experiences sorrow and feels pain as intensely as any of us humans do. In a compelling appeal to reason and human kindness, Matthieu Ricard here takes the arguments from his best-sellers *Altruism* and *Happiness* to their logical conclusion: that compassion toward all beings, including our fellow animals, is a moral obligation and the direction toward which any enlightened society must aspire. He chronicles the appalling sufferings of the animals we eat, wear, and use for adornment or "entertainment," and submits every traditional justification for their exploitation to scientific evidence and moral scrutiny. What arises is an unambiguous and powerful ethical imperative for treating all of the animals with whom we share this planet with respect and compassion.

The Chimpanzee Jane Goodall, Albert Schweitzer Institute for the Humanities, Quinnipiac College, 1994

The Third Chimpanzee Jared M. Diamond, 1992 The Development of an Extraordinary Species We human beings share 98 percent of our genes with chimpanzees. Yet humans are the dominant species on the planet -- having founded civilizations and religions, developed intricate and diverse forms of communication, learned science, built cities, and created breathtaking works of art -- while chimps remain animals concerned primarily with the basic necessities of survival. What is it about that two percent difference in DNA that has created such a divergence between evolutionary cousins? In this fascinating, provocative, passionate, funny, endlessly entertaining work, renowned Pulitzer Prize winning author and scientist Jared Diamond explores how the extraordinary human animal, in a remarkably short time, developed the capacity to rule the world . . . and the means to irrevocably destroy it.

West African Chimpanzees Rebecca Kormos, 2003 Wild chimpanzees are only found in tropical Africa, where their populations have declined by more than 66% in the last 30 years. This Action Plan focuses on one of the four chimpanzee subspecies, the western chimpanzee, which is one of the two subspecies most threatened with extinction. This publication presents a plan for action that represents a consensus among all parties concerned with the conservation of chimpanzees.

**Applied Ethics in Animal Research** John P. Gluck, Tony DiPasquale, F. Barbara Orlans, 2002 This volume covers the following topics: moral standings of animals, history of the methods of argumentation, knowledge of the animal mind, nature and value of regulatory structures, and how respect for animals can be converted from theory to action in the laboratory.

*When Elephants Weep* Jeffrey Moussaieff Masson, 2009-10-21 This national bestseller exploring the complex emotional lives of animals was hailed as a masterpiece by Elizabeth Marshall Thomas and as marvelous by Jane Goodall. The popularity of *When Elephants Weep* has swept the nation, as author Jeffrey Masson appeared on Dateline NBC, Good Morning America, and was profiled in People for his ground-breaking and fascinating study. Not since Darwin's *The Expression of Emotions in Man and Animals* has a book so thoroughly and effectively explored the full range of emotions that exist throughout the animal kingdom. From dancing squirrels to bashful gorillas to spiteful killer whales, Masson and coauthor Susan McCarthy bring forth fascinating anecdotes and illuminating insights that offer powerful proof of the existence of animal emotion. Chapters on love, joy, anger, fear, shame, compassion, and loneliness are framed by a provocative re-evaluation of how we treat animals, from hunting and eating them to scientific experimentation. Forming a complete and compelling picture of the inner lives of animals, *When Elephants Weep* assures that we will never look at animals in the same way again.

**The Meaning of Success** Jo Bostock, 2014-03-06 *The Meaning of Success: Insights from Women at Cambridge* makes a compelling case for a more inclusive definition of success. It argues that in order to recognise, reward and realise the talents of both women and men, a more meaningful definition of success is needed. Practical ways of achieving this are explored through interviews with female role models at the University of Cambridge. First-person stories bring alive the achievements and challenges women experience in their working lives, and the effect gender has on careers. The book stimulates a debate about how to bring about a more inclusive working environment.

*Are We Smart Enough to Know How Smart Animals Are?* Frans de Waal, 2016-05-19 What separates your mind from the mind of an animal? Maybe you think it's your ability to design tools, your sense of self, or your grasp of past and future - all traits that have helped us define ourselves as the pre-eminent species on Earth. But in recent decades, claims of human superiority have been eroded by a revolution in the study of animal cognition. Take the way octopuses use coconut shells as tools, or how elephants can classify humans by age, gender, and language. Take Ayumu, the young male chimpanzee at Kyoto University who demonstrates his species' exceptional photographic memory. Based on research on a range of animals, including crows, dolphins, parrots, sheep, wasps, bats, whales, and, of course, chimpanzees and bonobos, Frans de Waal explores the scope and depth of animal intelligence, revealing how we have grossly underestimated non-human brains. He overturns the view of animals as stimulus-response beings and opens our eyes to their complex and intricate minds. With astonishing stories of animal cognition, *Are We Smart Enough to Know How Smart Animals Are?* challenges everything you thought you knew about animal - and human - intelligence.

**Speaking of Apes** Thomas Albert Sebeok, Donna Jean Umiker-Sebeok, 1980-05

*Imagining Extinction* Ursula K. Heise, 2016-08-10 We are currently facing the sixth mass extinction of species in the history of life on Earth, biologists claim—the first one caused by humans. Heise argues that understanding these stories and symbols is indispensable for any effective advocacy on behalf of endangered species. More than that, she shows how biodiversity conservation, even and especially in its scientific and legal dimensions, is shaped by cultural assumptions about what is valuable in nature and what is not.

**The Soul of an Octopus** Sy Montgomery, 2015-05-12 Finalist for the National Book Award for Nonfiction \* New York Times Bestseller \* A Huffington Post Notable Nonfiction Book of the Year \* One of the Best Books of the Month on Goodreads \* Library Journal Best Sci-Tech Book of the Year \* An American Library Association Notable Book of the Year “Sy Montgomery’s *The Soul of an Octopus* does for the creature what Helen Macdonald’s *H Is for Hawk* did for raptors.” —New Statesman, UK “One of the best science books of the year.” —Science Friday, NPR A New York Times bestseller from the author of *The Good Good Pig*, this “fascinating...touching...informative...entertaining” (The Daily Beast) book explores the emotional and physical world of the octopus—a surprisingly complex, intelligent, and spirited creature—and the remarkable connections it makes with humans. In pursuit of the wild, solitary, predatory octopus, popular naturalist Sy Montgomery has practiced true immersion journalism. From New England aquarium tanks to the reefs of French Polynesia and the Gulf of Mexico, she has befriended octopuses with strikingly different personalities—gentle Athena, assertive Octavia, curious Kali, and joyful Karma. Each creature shows her cleverness in myriad ways: escaping enclosures like an orangutan; jetting water to bounce balls; and endlessly tricking companions with multiple “sleights of hand” to get food. Scientists have only recently accepted the intelligence of dogs, birds, and chimpanzees but now are watching octopuses solve problems and are trying to decipher the meaning of the animal’s color-changing techniques. With her “joyful passion for these intelligent and fascinating creatures” (Library Journal Editors’ Spring Pick), Montgomery chronicles the growing appreciation of this mollusk as she tells a unique love story. By turns funny, entertaining, touching, and profound, *The Soul of an Octopus* reveals what octopuses can teach us about the meeting of two very different minds.

**Dare to See** Katie Brown, 2019-09-24 Discover God in everything you do as How-To Expert Katie Brown teaches you to slow down, pay attention, and find your footing during tough times. Brown is known as a Lifestyle Diva. Through her TV shows, books, blogs and social platforms she offers her 1+ million fans both inspiration and guidance on how to create a rich, abundant life decorating their homes, creating fabulous meals and hosting memorable events. However, these are the small things that decorate our lives. Brown believes that the real beauty, the real color, can only be achieved by tuning into the ultimate expert-God. Brown shares how she has found God outside the church walls by embracing the sacred as a natural part of everyday life. *DARE TO SEE* includes 30 personal essays that illuminate how Brown has found God's presence in her

own real-life experiences from early childhood to the present. From being a victim of a drive-by shooting, experiencing incredible career success or searching for family fulfillment, Brown's stories will resonate with anyone whose life has been touched by doubt, hurt, defeat, understanding, love, abundance and hope. In DARE TO SEE, Brown shows us how to discover God everywhere we go and in nearly everything we do as we learn to pay attention, slow down, live with purpose, and fully, joyfully see all we've been given.

**Awe for the Tiger, Love for the Lamb** Rod Preece, 2006-06-19 Respect for animals has always been a part of human consciousness. Poets, thinkers, philosophers, scientists and statesmen have long celebrated our compassion towards Earth's other beasts. Awe for the Tiger, Love for the Lamb compiles the most significant statements of sensibility to animals in the history of thought. From the myths of the ancient world to the Middle Ages to Darwin and beyond, Preece captures the most telling and fascinating accounts of humankind's relationship to the wild world, placing them in historical context. Jung called it an unconscious identity with animals, while Wordsworth saw it as the primal sympathy which having been must ever be. Linking the diverse chords of human experience that are touched by the animal world, Preece shows that despite a historical thread of cruelty, there still remains in all humanity a constant underlying concern for other beings as an integral part of the moral community. With musings and meditations from Lao Tse to Mohammed, from Plato to Jane Goodall, from classical religion to parliamentary proceedings, Awe for the Tiger, Love for the Lamb is an original, superbly researched history that deepens our understanding of all living beings.

**Animal Bodies, Human Minds: Ape, Dolphin, and Parrot Language Skills** W.A. Hillix, Duane Rumbaugh, 2013-04-17 Several books chronicle attempts, most of them during the last 40 years, to teach animals to communicate with people in a human-designed language. These books have typically treated only one or two species, or even one or a few research projects. We have provided a more encompassing view of this field. We also want to reinforce what other authors, for example Jane Goodall, Sue Savage-Rumbaugh, Penny Patterson, Birute Galdikas, and Roger and Deborah Fouts, so passionately convey about our responsibility for our closest animal kin. This book surveys what was known, or believed about animal language throughout history and prehistory, and summarizes current knowledge and the controversy around it. The authors identify and attempt to settle most of the problems in interpreting the animal behaviours that have been observed in studies of animal language ability.

Postcontinental Realism Ernesto Castro, 2022-10-17 Is philosophy still alive? Are there any alternatives to univocal postmodernist thought? Is there any point in asking age-old questions about the existence of reality and the possibility of knowledge, about being (ontology) and knowing (epistemology)? In this book, Ernesto Castro issues a resounding yes to these and many other questions plaguing philosophy today. Postcontinental realism is the term coined by Castro to designate a group of realist thinkers who have overcome contemporary philosophy's time-honored division between the analytic

tradition (concerned with epistemological and scientific questions) and the continental tradition (concerned with artistic and ontological questions). Written in a perfectly plain style that is accessible to readers from all walks of life, including those without a previous academic education, the author introduces the readers to the works and ideas of important, living philosophers such as Quentin Meillassoux, Ray Brassier, Graham Harman, Iain Hamilton Grant, Maurizio Ferraris, or Markus Gabriel. Published with the support of Fundacion Sicomoro.

**Unleashing Your Dog** Marc Bekoff, Jessica Pierce, 2019-03-05 No matter how cushy their lives, dogs live on our terms. They compromise their freedom and instinctual pleasure, as well as their innate strategies for coping with stress and anxiety, in exchange for the love, comfort, and care they get from us. But it is possible to let dogs be dogs without wreaking havoc on our lives, as biologist Marc Bekoff and bioethicist Jessica Pierce show in this fascinating book. They begin by illuminating the true nature of dogs and helping us walk in their paws.; They reveal what smell, taste, touch, sight, and hearing mean to dogs and then guide readers through everyday ways of enhancing dogs's freedom in safe, mutually happy ways. The rewards, they show, are great for dog and human alike.

Current Ornithology Volume 17 Charles F. Thompson, 2010-09-09 Current Ornithology publishes authoritative, up-to-date, scholarly reviews of topics selected from the full range of current research in avian biology. Topics cover the spectrum from the molecular level of organization to population biology and community ecology. The series seeks especially to review (1) fields in which an abundant recent literature will benefit from synthesis and organization, or (2) newly emerging fields that are gaining recognition as the result of recent discoveries or shifts in perspective, or (3) fields in which students of vertebrates may benefit from comparisons of birds with other classes. All chapters are invited, and authors are chosen for their leadership in the subjects under review.

The Symbolic Species Terrence William Deacon, 1997 Discusses the evolution of language from the viewpoint of symbolic reference as opposed to the conventional grammar-based theories.

**The Art of Being Human** Michael Wesch, 2018-08-07 Anthropology is the study of all humans in all times in all places. But it is so much more than that. Anthropology requires strength, valor, and courage, Nancy Scheper-Hughes noted. Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a heroic profession. What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition

is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the first draft edition from 2017 and includes 7 new chapters.
